November 14, 2011 - Vol. 5, Update No. 16

Swish Speaks Construction Season Wrap Up

Hey there Lansing, I've got great news! This phase of the CSO project is complete!

West Oakland between Walnut and Martin Luther King Jr., was re-opened on November 8. We couldn't have done it without your support.

The CSO Control Program is a 30-year initiative to update Lansing's single-pipeline sewer system to a dual-pipeline system. In the new separated sewer system, stormwater is discharged to local waterways using the existing (formerly combined) sewers. The new sanitary sewers transport sewage to the wastewater treatment plant for treatment prior to discharge to the Grand River. Great news for me and my fish friends!

The CSO Control Program has already helped eliminate more than 952 million gallons of sewage per year from reaching our waterways. That number will only grow as the project moves forward.

I can't say thank you enough to the Lansing residents for helping preserve my home!

**Thanks again Lansing.
Sea ya' on the flipper side!**

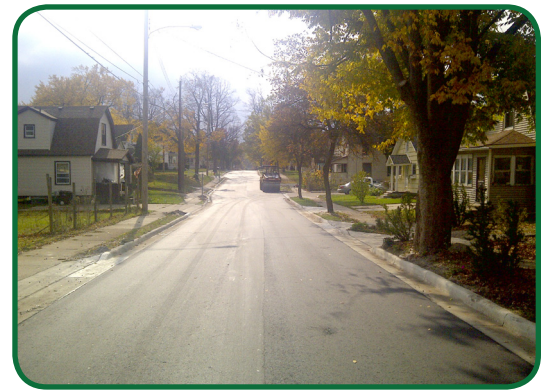

FINAL ISSUE OF THE SEASON! In three weeks, we will be 100% complete!

015N – Oakland

- All streets are final paved.
- Oakland to be final striped and opened to traffic this week.
- Miscellaneous clean-up work to continue for the next three weeks.
- Sewer lining to begin this week on Chicago, Princeton, Pine, Summerville and Martin Luther King, Jr.

Final paving on Pine

Final paving on Sycamore

Non-CSO Construction Projects

- Clippert (between Kalamazoo and Michigan): **PROJECT IS COMPLETE!**
- Clippert (between Michigan and Saginaw): **PROJECT IS COMPLETE!**

If you have any comments or suggestions, please send them to Alec Malvetis, Assistant City Engineer/CSO Project Manager at amalveti@lansingmi.gov.
