Mr. Sanford informed the committee this property had a fire on 8/30/2016 and was red tagged on 11/29/2017. It went before the Demolition Board on 6/27/2019 who are asking for 30 days make safe or demolish. Currently, he added, there has been no contact by the owners nor have they applied for permits. The estimated cost of repairs is $71,400.00. Council Member Wood asked if there was any insurance in escrow since it was a fire, and Mr. Sanford was not able to provide that information at this time. (After the meeting, Mr. Sanford emailed the Committee stating that there was no insurance money being held by the City).

MOTION BY COUNCIL MEMBER HUSSAIN TO SET THE SHOW CAUSE HEARING FOR 3309 VIKING FOR NOVEMBER 18, 2019. MOTION CARRIED 2-0.

DISCUSSION – Update on LPD Substation at Walnut St. Apts.
Council Member Wood recapped what Chief Yankowski had stated to the Committee in July on the project including secure doors, keypad entry and additional security items added to the room. There was a discussion at some point on who would cover the cost, but at this point Council is not aware of any discussions, decisions or actions. The LPD has informed the Committee that there is now a designated CPO in North Lansing; however, the neighborhood is still anxious for this substation. Chief Green confirmed his knowledge that TWG has been asked to make the modifications, and the most recent communication he has with the owners, TWG, was in August when they agreed to put in the key pad. He added that his communications with the management is that TW itself is still working on the action plan to put in place. Council Staff was asked to send a letter to the owners to attend a future Committee meeting, either 11/7/2019 or 11/21/2019.

DISCUSSION – CPTED- Crime Prevention through Environmental Design
Council Member Wood started the discussion by noting Council is looking at problematic areas and where to increase safety. Professor Nubani provided examples of where CPTED has been successful and brief history on the design method, which began in 1970’s. At that time, it received funding from the Department of Justice, however it ceased so there are not many case studies after the late 1980’s in the United States. In other countries they have seen an 80% drop in crime. Areas in the United States that are starting to utilize it again have incorporated lighting, landscaping and addressed signage to increase a drop in crime.

The Committee and Professor Nubani briefly discussed options for liquor stores to increase visibility which included the reduction of signs to only cover 20-25% of the windows, and what some cities are using which is a $300/day fine if the sign is not removed.

Council Member Garza stated his interest in any testimony from people who have experienced the crime due to the lack of change Council Member Wood pointed out to Chief Green and Professor Nubani that with the recent ordinance changes and the new Corridor Officer, the
City is receiving complaints from the business owners and sign companies. Professor Nubani noted that some people resist because there is not a lot of creativity, but the business could use a digital screen, could still use signs but not over 20-25% of the window. She offered to provide details on what can, cannot work in CPTED, and offered to provide key findings that would support it. She noted that she has also done research with criminals, who state they look at visual access in a business; they want to see and not be seen, so the City needs to look at blind spots outside the store, the signs outside, landscaping, etc. Council Member Hussain asked her thoughts on barriers in front of buildings, and also asked if she had looked at the Grand Rapids Ordinance. Professor Nubani stated she has looked at code, which is similar to other communities, she has researched. Council Member Wood asked if there are any justice funds and Professor Nubani admitted they had hoped to have grant funds, however they had applied jointly with the City LPD and MSU on a reduction grant but they did not get it. They will apply again. Professor Nubani was asked to look at the Grand Rapids ordinance. Mr. McGrain admitted his office has been working with the OCA on what his office has seen since enforcing the new sign ordinance and having a Corridor Officer, and hoped to bring back their concerns with the ordinance to the Committee in the future. Currently they are working through each situation case by case. They a have been able to connect businesses with façade grant improvement programs. Council Member Hussain asked that the group discuss how the ordinance can be good for the business and the patrons. Professor Nubani offered to research information and provide it to Council, and Council Member Wood encouraged Mr. McGrain to work with the professor on a potential public service announcement on City TV providing additional facts. Mr. McGrain acknowledged the request and noted they are working on an enhanced communication platform.

Other
Council Member Hussain asked Chief Green for an update on a noise nuisance at 1603 Victor. Chief Green stated the initial step would be for LPD to speak to the owners because they have found that 70% can be resolved verbally between the resident and LPD. If it is not resolved, a violation is written up and it goes through the OCA.

Council Member Hussain then asked about 4700 Pleasant Grove, and Chief Green stated that special operations is working on the case.

Discussion/Action - Continued
DISCUSSION – Committee Report On Ordinance Amendments to Chapter 404, Section 404.13 Parking
Ms. Harkins informed the Committee that the Mayor worked off what was adopted, the Draft 4 and the comparison memo done by the OCA. She noted the Mayor’s version spoke to the limitations and most of the other changes were clarification. Council Member Wood noted that the Committee was working on only two (2) zones; downtown and residential. At one point Council was told the Mayor’s intentions were for each neighborhood to decide if they wanted it, which is not supported by the Committee. The Committee understands that the downtown area that was addressed in the ordinance drafted by the Committee on Public Service addressed those residents who live downtown where there is no vast parking, but this Committee wants the other residential area in the City to be all one zone. Ms. Harkins stated her understanding was that from the first ordinance, downtown was created and the Mayor would create the other zones. Council Member Wood informed Ms, Harkins that in 2019 when this Committee began finalizing an ordinance they were told by the OCA that the newest adopted ordinance on the parking sponsored by the Committee on Public Service was for downtown but also created other zones. Therefore before that could amended they were advised to create this recent Ordinance for Chapter 404, Section 404.13 for Residential Parking. Ms. Harkins admitted she was not aware of that statement so they were working under the understanding that the Mayor was creating zones. Council Member Wood stated...
this Committee is not interested in doing that which would put one neighborhood up against another in their determination. Council Member Hussain asked if the Mayor was interested in the "parking must be needed" piece in the ordinance, and Ms. Harkins confirmed the Mayor agrees it should be determined by the Parking Manager. Council Member Hussain confirmed that during the process and adoption of the ordinance for the downtown Council Member Spadafore reached out to this Committee and assured them it did not address residential, it wasn’t until this Committee wrote the ordinance to address residential 2am – 5am parking that Mr. Abood stated the first ordinance by the Committee on Public Service did address residential so it would have to be amended after this new ordinance was adopted. At the time it appeared that Council did not understand that zones were incorporated into that first ordinance. Therefore the Committee is looking for two (2) zones, one downtown and one residential; the initial plan with Mr. Gamble (Parking Manager) was to pass this new ordinance for Chapter 404 Section 404.13 by September or October with it to take effect January 1, 2020 allowing the department time to create the permits, provide resources for enforcement and provide education to the public. Mr. McGrain concurred and has a commitment from the Mayor to provide the resources. This would not be LPD, a new parking officer with limited hours and potentially more hours in the future. Council Member Wood encouraged Mr. McGrain and Ms. Harkins to speak to the Council Internal Auditor who has statistics on the previous parking officer who did it before and the revenue it. In addition to writing tickets for no 2am – 5am parking that officer was able to address front yard parking and parking in front of hydrants. Ms. Harkins was invited back to the November 7, 2019 meeting with an update from the Mayor, and Ms. Hagen was asked to look at the notice requirements for the public hearing and it zoning would apply.

RE: Walnut Park, Lansing Michigan  
City of Lansing Police Sub Station

Dear Mr. Whitsett:

The Lansing City Council Public Safety Committee contacted you in June 2019 about the Walnut neighborhood concerns that the police substation that was promised as part of the construction of Walnut Park was not functioning. At that time you did respond and a meeting was coordinated on site with yourself and the LPD Chief of Police, Chief Yankowski.

We were informed on July 18, 2019 that you and the Chief have met on this issue and made plans to convert an office, install a custom ordered steel door, close off the bathroom access from that room, and install camera’s and door codes. At this time, the Committee was informed of the planned establishment of this police substation/office to be complete in September.

Recently the Committee spoke to the new LPD Chief, Daryl Green, who informed them that the project was still not completed. In order to help resolve the matter and have a functioning substation at this location, this needs to be addressed as soon as possible. We are disappointed in the progress and completion of this substation at Walnut Park, therefore we are reaching out to ask you to attend one of the upcoming meetings with the Committee, Chief Green and the City Attorney:

- Thursday, November 7, 2019 @ 3:30 p.m.
- Thursday, November 21, 2019 @ 3:30 p.m.

We look forward to seeing you at one of the above meetings, so please contact our City Council Office Manager at 517-483-7683 (sherrie.boak@lansingmi.gov) as soon as possible, so we can secure your spot on the agenda. We are anxious for this project to be addressed and completed for the neighborhoods.

Sincerely,

Re: Parking Ordinance 404.11, Public Safety Committee Draft, and Mayor’s Proposed Changes

Date: October 21, 2019

This is a summary of the provisions of the existing Parking Permit Ordinance, 404.11, the most current draft of the Public Safety Committee’s proposed 404.13 addressing Parking Permits in neighborhoods, and the Mayor’s proposed changes to 404.11 to incorporate the much of proposed 404.13. I am highlighting the operative provisions of 404.11 and proposed 404.13, and then detailing how Mayor’s proposed changes attempt to combine the two. Copies of the source documents are attached for reference.

404.11 Overview:

- Residential Permit Parking Zones for street parking are to be set by traffic control orders (TCO), pursuant to Michigan Uniform Traffic Code (UTC);
  - Note: all TCOs that are not temporary (such as for emergencies or road construction) must be approved by resolution of City Council.
  - Note: the TCOs set the limits on each specific zone, e.g.: where permit holders can park, what time of day the permits are good for, etc. These elements do not have to be consistent across all zones, and can be tailored to the needs of that specific zone based on traffic engineering considerations, and feedback from residents in the proposed zone.
- Places supervision and administration for the residential street parking program in the office of the Parking Manager. Directs the Parking Manager to work with the Public Service Department when temporary suspension of permitted parking to accommodate snow removal, construction, and other emergencies;
- An application for a permit must be made to Parking Director, and contain the following information:
  - Name of owner/operator of vehicle;
  - Primary address of owner/operator;
  - Email and cellular telephone contact information for owner/operator;
  - Vehicle description, including make, model, license plate and registration numbers;
- An applicant must upon request supply to following information as well:
  - Executed lease or other proof of primary address;
- Current, valid vehicle registration, and if operator is other than owner, certification that operator has control of vehicle and is keeping it at his or her primary address;
- Parking Director not required to grant a permit to any applicant;
- If granted, the permit:
  - is only valid for the vehicle it was applied for;
  - must be semi-permanently affixed to the vehicle windshield for enforcement purposes;
  - must be displayed on the vehicle at all times it is parked along the street;
  - must be paid for on an annual basis, and the permit year runs from September 1 to August 31;
- Annual permit fee to be set by resolution of Council;
- Other limitations include:
  - Permits are only valid in the TCO zone in which they were granted, i.e.: a zone “A” permit holder cannot park in zone “B”;
  - Permits do not guarantee or reserve a street parking spot;
  - Permits do not exempt anyone from other parking regulations and ordinances, except the overnight parking limitation if the TCO so states;
  - Permits may be temporarily suspended to address snow removal, construction, and emergencies;
  - A permit holder may transfer their permit to a new vehicle, but not to a different person;
  - Repeated parking violations by a permit holder, in their zone, may result in revocation of the permit by the Parking Manager;
  - Explicit violations of this ordinance (404.11) will void any granted permit automatically, without notice.

Proposed 404.13 Overview (as of Committee Draft 4, dated 9/5/19):

- Overnight Permit Parking Zones for street parking are to be set by ordinance first, and then confirmed by traffic control orders (TCO), pursuant to Michigan Uniform Traffic Code (UTC);
- Supervision and administration of the Overnight Permit program is again placed with the office of Parking Manager, with the same considerations for snow, emergencies, and construction;
- An application for a permit must be made to Parking Director, and contain the same information as under 404.11, but
  - includes the option for a land telephone number in addition to cell phone and email;
  - and requires applicant to explain why they need to park overnight between 2 a.m. and 5 a.m.;
- The supplemental supporting documentation that applicant must provide upon request is the same as under 404.11;
- 404.13 provides for two types of overnight parking permits, as opposed to only the annual permit under 404.11:
  - **Annual Permits**, which are similar to the permits under 404.11, but with the following changes:
    - the permit year runs from July 1 to June 30;
    - payment plans may be set up at the discretion of Parking Manager;
  - **Temporary Permits**, which are not contemplated under 404.11, and have the following characteristics:
    - only to be granted if Parking Manager determines that the zone has capacity;
    - intended for use by non-resident visitors, but only if a resident of the zone applies for the permit, and sponsors the intended permit user;
    - only valid for 72 hours;
    - hangtag rather than a semi-permanent sticker;
- Other limitations are the same as under 404.11, but with the following additions:
  - No permit may be issued for RVs, mobile homes, trailers, boats, or vehicles with more than 2 axles;
  - No more than one annual permit and one temporary permit may be granted to a residential parcel at any given time;
  - No more than 4 temporary permits may be granted to a residential parcel per calendar year.

The Mayor’s proposal appears to combine several, but not all, new portions of the Committee’s proposed 404.13 with existing 404.11:

- Rename the “Permit” in 404.11 to be the “Annual Permit”;
- Add provisions for the “Temporary Permit” proposed in 404.13;
- Keep the changes to annual permit application requirements, except that he wants to further discuss the requirement for explanation of need;
- Relax the requirement that annual permits must be semi-permanently affixed, and allow Parking Manager to determine the format of the physical permit;
- Similarly, allow the display requirement to be flexible to accommodate different formats if approved by Parking Manager;
- Add the provisions in proposed 404.13 for temporary permitting, except that he wants to further discuss:
  - the limitations on how many annual permits and temporary permits can exist at any time, and
  - the limitations on how many temporary permits can be granted per calendar year;
- Add the restriction that permits not be issued for RVs, mobile homes, trailers, boats, or vehicles with more than 2 axles;
- Allow for permits to be transferred between people and vehicles with approval of the Parking Manager;
- Require that if a permit holder disposes of or sells the car they have an annual permit for, the permit holder must notify the Parking Manager.
404.11. - Residential permit for street parking.

(8) A replacement permit may be issued only if all or part of the original permit is produced at the time that a replacement permit is applied for, or if proof of theft of the vehicle is demonstrated to the satisfaction of the Parking Manager;

(d) **Conditions on the permit and permit holder.** The use and validity of a residential streets permit is subject to all the following conditions:

(2) A permit may be used only by the permit holder to whom it is issued.

(3) A permit shall not guarantee or reserve to the holder a parking space in the permit zone.

(4) A permit shall not exempt the holder from the observance of any parking or traffic regulation or ordinance, other than the specified overnight parking restriction.

(7) A permit holder may not transfer a permit to any other person or vehicle.

(10) If a permit holder commits three parking violations in the parking zone for which the permit has been issued, the permit, upon review, may be revoked by the Parking Manager;

(11) If a permit holder violates any of the conditions in this section, the permit shall automatically become void and be terminated and revoked without notice.

Subject: 2 am - 5 am parking

Dear Public Safety Committee Members,

As you know, the Public Safety Committee is working on an ordinance to amend the 2 am – 5 am parking prohibition to allow for people to park on streets from 2 am – 5 am if they have a city-issued permit. Council President Wood and I have spoken about this in the past, and I have indicated support for this effort.

I reviewed the original ordinance version from the Public Safety Committee. While I support most of the proposal, and I believe there were several good additions to the ordinance that were not there already, I expressed a few concerns to be discussed. These included (1) people having to provide information on need before getting a permit, (2) requiring council to pass an ordinance for each zone of the city to use this instead of using the traditional traffic control orders, and (3) the specific limits in both temporary and permanent ordinances.

After discussion with some of the members of the PS Committee, and in the spirit of compromise, we provided an Administration substitute for consideration. In this sub we agreed to the committee-proposed language on the requirement of need, we provided language allowing the traditional traffic control orders to govern which parts of the city can have zones established, and we allowed for the parking manager to decide appropriate limits in each parking zone.

In the Public Service Committee last week, it was indicated to my staff that committee members have concerns about having multiple parking zones throughout the city which would pit neighborhoods against each other. The request from the committee members was for only two zones – a downtown zone and a zone for the rest of the city. After discussing this with city staff, we will concur with not utilizing multiple zones and instead propose to remove zones entirely and make this new 2 am – 5 am permit system effective citywide. This will streamline the process, and will make it easier for our staff to implement and track licenses citywide. We do not see a reason to make the downtown any different than the rest of the city. The permits will have the same effect for downtown overnight parking as it would anywhere else, and we still have the “Spadafore” ordinance on the books if we need something that allows for traffic control orders to be issued for 24 hour parking.

As such, attached is the newest version provided by the Administration. I believe this is a fair compromise and final product, and is the best policy moving forward for the city.
Additionally, my Administration will commit to enforcement of this new ordinance. We currently enforce 2 am – 5 am as possible now, but that responsibility falls to the Lansing Police Department (as our parking enforcement staff only works during the day). As we all know, overnight parking enforcement is not the best usage of our limited LPD resources at night, and this is a low priority for Lansing police officers. With the new 2 am – 5 am ordinance on the books, our parking department will now have funding to bring on parking staff to enforce the ordinance and ensure that those that park illegally will be ticketed under the ordinance. We expect that to happen around Jan 1, but could be slightly sooner or later, depending on the setting up of the permitting process and having an appropriate amount of time to publicly provide education.

Please feel free to contact me if you have any questions about my position on this issue, and I look forward to seeing this ordinance on the City Council floor for discussion and a vote soon.

Note – This assumes that all tickets are paid timely and collected. This would not be the case in the real world application because some tickets would remain unpaid and other would be paid with the additional fees added for late payment. Consequently, this still provides an estimated revenue stream with regards to these type of activates for estimation and planning purposes.

Please, let me know if you have any other information and/or corrections to any of the material expressed above.

Protect Your Employees, Visitors, and Property with a Facility Profile

Smart911Facility.com
Provide public safety with critical information for a faster emergency response.
Why Should I Create a Smart911Facility Profile?

Responding to facilities and buildings is challenging for first responders. A Smart911Facility Profile can significantly improve emergency response.

Improving Responders' Ability to Locate an Emergency Incident
Floor plans and other critical data provided through Smart911Facility can significantly help streamline response.

Managing Emergency Impact
The faster emergency responders can access building details, such as utility shutoffs and AEDs, the better they can minimize the impact to life and property.

Enhancing Coordination Between Public Safety and Your Organization
Many facilities have unique internal emergency response procedures. Your Facility Profile can provide these to 9-1-1 and first responders during an incident at your location.

Providing a Method for Keeping all of Your Facility Information Updated
Smart911Facility provides you with an easy-to-use of securely storing and backing up your facility's critical information.

What Can Your Smart911Facility Profile Include?

- Floor plans and other building info
- Buildings within a campus
- Gate or access codes
- Fire and security alarm contacts
- Utility access and shutoff locations
- Landline phone numbers
- Geographical coordinates including parking lots and outdoor areas
- Points of contact and property owner information

Be Prepared for Any Emergency.

In the event of a fire, your Facility Profile will save time by providing firefighters building layouts and utility information.

In a medical emergency, gate codes and access points will be available to EMS to help treat the victim faster.

In the event of an active shooter, police can use building details, campus layouts, and key contacts to coordinate their response.
