

# End of the Day Issues

What do you do when certain things don't add up at the end of the day while following your Closing of the Polls procedures?

You consult the  
Troubleshooting Binder!

## Summary Report is NOT Zero

If the Ballot Summary Report **Line L** does not balance as expected and the Chair and Co-Chair do not know why\*, then the Precinct Team should start these 3 procedures simultaneously using the entire team:

Notify your Superchair of problem immediately

### Applications to Vote Check (1 or more Inspectors)

- 1) In order by voter number, stack applications to vote in groups of 25
  - a. If the Applications to Vote count does NOT equal tabulator count or the E poll book count, then make sure Applications to Vote are in the voter number order

### Tabulator Check – (2 or more Inspectors)

- 1) Check all 3 bins of the tabulator again to collect all ballots
- 2) Count all tabulated ballots by hand in groups of 25
  - a. If the total number of ballots does NOT equal tabulator count, then **Notify Superchair and Clerk's Office immediately to request tabulator reset.**
  - b. These steps must be completed by at least one Republican and Democrat

### E Poll Book Check

- 1) Review E Poll Book End of Day Guide
  - a. Make sure all lines of the Ballot Summary are completed, especially Line A which should not have been altered without Clerk's Office approval

**Note:** using the Tab key will move the cursor through all of the required fields starting at Line D

- 2) Review *E Poll Book List of Voters Report* to look for skipped ballot numbers and against the Application to Vote to see if any voters were not entered into the E Poll Book

**Note:**

Please “make a remark” in E Poll Book if any or all of these procedures were completed. Once all of these and all other closing steps are completed, then the precinct team can be dismissed.

*\*If precinct chair is aware that the ballot balance check is off during the day and explanation is recorded as an E Poll Book Remark, then it is possible that these steps will not be required to be completed. Please consult with your Superchair to confirm*

## Duplicating Ballot Procedures:

Duplications are not made until after 8:00 p.m. A ballot must be duplicated if the voter is no longer present and:

- the ballot was marked with a marking tool that the tabulator does not recognize; or
- the voter attempted to correct the ballot by crossing out or erasing markings; or
- ballot is defective

Often these ballots will be found in the Write-In Bin, the bin must be checked every election for accidental write-in votes.

### Duplicating Procedure:

- Two Inspectors of different parties must work together
- Write “original” and sequence number on voter marked ballot
- Write “duplicate” and matching sequence number on replacement ballot
- One inspector reads votes from original ballot while other inspector marks duplicate ballot
- Do not record invalid write-in votes on duplicate
- Do not record invalid/stray marks
- Do not record erasures/clearly crossed out marks
- Record all other marks, *even overvotes!*
- Trade ballots and repeat to confirm duplication

### Validity Standard:

- Michigan is not a “voter intent” state
- Valid mark –
  - there must be a mark in the designated target area of the ballot and

- the mark is consistent with other marks on the same ballot
- Invalid mark –
  - there is no mark in the designated target area of the ballot
  - or
  - the mark is inconsistent with other marks on the same ballot
- Corrections are allowed

Optical Scan Systems Employing  
“Oval” Target Areas

**Valid markings:** Each of the examples provided below is a valid vote as there is a mark within the “predefined area” for casting a vote.

**Invalid markings:** Each of the examples provided below is an invalid vote as a mark does not appear within the “predefined area” designated for casting a vote.

**Corrections:** A correction that causes a “false” tabulator read does not count as a valid vote.

**Stray marks:** “A stray mark made within a predefined area is not a valid vote. In determining whether a mark within a predefined area is a stray mark, the board of canvassers or election official shall compare the mark with other marks appearing on the ballot.”

## Closing Procedures

### Steps to Sealing Ballot Bag After Election Polls Close

Confirm that all contents are inside the ballot bag

Place **ONLY** the following items in the ballot bag:

1. All unused ballots
2. All voted ballots except provisional envelope ballots
3. The Envelope for Spoiled (or Defective) Ballots with any spoiled ballots inside
4. Duplicated Ballot Envelope (only if any ballots were duplicated OR VAT ballots issued.)
5. All unused VAT Voter Cards
6. All USED VAT Voter Cards

\*Remember: if you have to cut the plastic blue seal because something was forgotten, a new seal number needs to be **UPDATED** in Poll Book and Certificate

Zip the bag completely closed

Complete Precinct Transfer Container Certificate with seal number from the blue plastic seal.

Push the two zippers together

Thread the blue plastic seal through the holes on both zippers.

Put the Ballot Bag Certificate onto the blue plastic seal.

8. Thread the blue seal through the hole in the **BACK** of the seal.

Seal should only go through about two to four inches

Conduct a final review. Make sure the two zippers cannot be pulled apart.

If you need to reopen the ballot bag, you will need to record the new seal # on the certificate and poll book page I.
